

## **SPRAY – treatment for lice and nits**

Seboradin MED Treatment for Lice and Nits spray is a medicinal product to combat head lice.

The effective action of this oil-based product consists in inhibiting the development of lice by stopping oxygen supply. Applying the product to the entire scalp and hair kills the parasites living there. Its mechanical effectiveness is enhanced by the addition of andiroba oil and tea tree oil. Andiroba oil soothes irritations and alleviates the itching that is caused by lice bites. Its bitter taste efficiently deters lice.

The product has been tested microbiologically and dermatologically.

### **INSTRUCTIONS FOR USE:**

Spray the scalp and the entire length of hair. Massage the product carefully into scalp and hair to spread it thoroughly. Wait 45 minutes after applying the product. Thoroughly wash hair and scalp with Seboradin MED Treatment for Lice and Nits shampoo.

To remove lice and nits, carefully brush hair with a lice and nit comb. To prevent lice infestation, all household members should use Seboradin MED Treatment for Lice and Nits lotion as a preventive measure.

Volume: 100 ml
